FULL STACK WEB AND MOBILE DEVELOPER

React Native and frontend developer focused on building production-ready user experiences across mobile, web, and internal business tools. Strong hands-on experience with Expo, React, Next.js, TypeScript, UI implementation from Figma, API integration, authentication flows, dashboards, and scalable component architecture. Comfortable owning end-to-end frontend delivery and contributing to backend tasks when needed with Node.js, Express.js, MongoDB, SQL, and Supabase.

CORE SKILLS

Languages: TypeScript, JavaScript

Mobile: React Native, Expo, NativeWind, React Navigation, Context API, Redux Toolkit, Zustand, TanStack Query

Frontend: React, Next.js, TanStack Start, Vite, Tailwind CSS, shadcn/ui, GSAP, Framer Motion, responsive UI, React Hook Form

Backend: Node.js, Express.js, REST API integration, WebSockets, Drizzle ORM, Prisma, MongoDB, PostgreSQL, MySQL, Supabase

Tools: Git, GitHub, Figma, Postman, Vitest, Jest, Jira, Agile/Scrum, Vercel, Netlify, Render, DigitalOcean

PROFESSIONAL EXPERIENCE

Web Development Instructor | BREINRX

Jan 2026 - Present

- Teach practical web development from fundamentals to modern application architecture, covering HTML, CSS, JavaScript, React, backend integration, databases, testing, and documentation.
- Mentor learners through project-based workflows, helping them structure applications, debug issues, and translate concepts into production-style implementations.
- Deliver workshops and technical sessions on frontend engineering, API integration, full-stack thinking, and clean development practices.

Development Lead | GDG Constantine

2025 - Present

- Lead the development direction for community projects, from scoping and planning to implementation and delivery.
- Coordinate technical execution across members working on frontend, backend, and UI/UX tracks.
- Organize workshops, guide project decisions, mentor contributors, and act as the main technical point of contact for development-related initiatives.

Freelance Full-Stack Developer | Self-Employed

2025 - Present

- Build modern web products, dashboards, and internal tools with React, Next.js, TypeScript, and Node.js, based on client needs and delivery constraints.
- Handle UI/UX execution, frontend architecture, backend integration, deployment, and performance-focused implementation across responsive platforms.
- Deliver business-facing products including e-commerce experiences, desktop tools, landing pages, and admin interfaces.

SELECTED PROJECTS

Fast Food App | React Native Developer

2025

Stack: React Native, Expo, TypeScript, NativeWind, TanStack Query, Context API, Express.js, MongoDB

- Built a mobile food ordering application with authentication, onboarding, menu browsing, category filtering, search, product details, cart management, order flow, and profile management.
- Implemented frontend architecture and API integration for a smooth ordering experience across account, menu, cart, and checkout-related flows.
- Designed the app around reusable UI patterns and a structured state-management approach to keep the experience scalable and maintainable.

E-Commerce Platform | Frontend Developer & UI/UX Designer

2025

Stack: React, Vite, Tailwind CSS, shadcn/ui, GSAP, TanStack Query, Context API

- Developed a customizable e-commerce platform with product discovery, filtering, instant purchase flow, shopping cart, checkout experience, and dynamic category management.
- Built dashboard-facing interfaces for analytics, product operations, and order handling, including multi-worker order processing flows.
- Owned the UI/UX direction, frontend implementation, and animation work, with a focus on clarity, responsiveness, and conversion-oriented user flows.

Room Reservation System | Frontend Developer, UI/UX Designer

2024

Stack: React, Vite, Tailwind CSS, shadcn/ui, Redux, TanStack Query, WebSockets, PWA

- Built a reservation platform that supports room discovery, booking, schedule visibility, account management, ratings, and feedback workflows.
- Delivered multi-role dashboard experiences for booking management, room management, and administrative control.
- Implemented real-time updates and mobile-friendly interaction patterns to improve usability across desktop and portable devices.

Stock Management Desktop App | Full-Stack Developer & UI/UX Designer

2025

Stack: Next.js, Electron, SQLite

- Built a desktop inventory system for tracking stock movement, sales activity, customer records, and transaction history.
- Implemented business workflows for quantity updates, history logs, sales management, and printable receipt generation.
- Designed the interface and application structure for day-to-day operational use in a business context.

ADDITIONAL PROJECTS

- **AI-Powered Email Organizer:** frontend and UI/UX work on an email management platform with AI-assisted categorization, summaries, and response support.
- **DevFest Constantine 2025:** full-stack contribution to the official event website for speaker, schedule, and registration workflows.
- **Tidis Tech:** animated landing page presenting agency skills, services, contact details, and a polished brand-facing web presence.

EDUCATION & LANGUAGES

Licence Degree (3-Year University Program) in Computer Science | Constantine, Algeria

Arabic: Native | English: Professional working proficiency | French: Basic working proficiency
